The Community Partnership System is a dynamic online platform to support organizations that serve youth and DPS school leaders and staff looking for external partners.

Visit: <https://extendedlearning.dpsk12.org/communitypartnerships> to learn more about CPS and how to start a profile. Once your preliminary profile has been approved, you will receive an email with additional information and support to add all of your programs and sites to CPS. If you already have a CPS profile, you can go straight to the login page at <http://cps.civicore.com>.

Technical Support

If you have any technical support questions about CPS, email Carol (carol_schneider@dpsk12.org) or visit <http://cps.uservice.com> for walkthrough and other support documents.

What is CPS?

The Community Partnership System (CPS) is an online tool that fills two vital community needs: creating a comprehensive inventory of available school day and out of school time programs in Denver and a reporting platform to link providers to Denver Public Schools (DPS) student outcome data. Providers enter information about their organizations, programs, sites and students served – creating a comprehensive profile of their services. While previous efforts to inventory out of school time services have been point in time only, CPS creates a platform where providers can provide regular, on-going updates to a program profile.

What are the steps to create a CPS profile? How do I become part of the public search? How do I get data reports on my DPS students?

1. Create your agency's preliminary profile by visiting The Civic Canopy's CPS page (<http://cps.civicore.com>). Follow the link to create a new profile, and your preliminary profile will be reviewed and approved within 3 days.
2. Once your preliminary profile is approved, you must return to CPS to add your programs and sites. Your profile is not considered complete until you include information about all of your programs and sites and have complete the required data elements. Your out of school time site(s) information is what will populate the public search.
3. Have you attended a New Partner Onboarding Session? Do you have questions about how to engage with DPS? Learn more and upcoming sessions [here](#).
4. At any time you are welcome to start the process of completing the DPS Partnership Agreement. This Partnership Agreement may also include a Data Sharing Agreement, which is what will allow you to access DPS student data (if applicable). Reach out to Carol Schneider to get the latest copy or visit <https://extendedlearning.dpsk12.org/communitypartnerships>
5. Your profile will be reviewed for completeness by CPS staff before being included in the Denver Afterschool Program Locator; you can find this and more at www.denvergov.org/DenverAfterschoolAlliance.
